

## ARCore-unterstützte Geräte

Was bedeutet es, dass ein Gerät unterstützt wird? Kurz gesagt, es hat unseren Zertifizierungsprozess bestanden. Die Zertifizierung ist wichtig, weil wir möchten, dass die Nutzer eine gute Erfahrung mit Ihrer AR-Anwendung haben.

Dies hängt vor allem mit dem sensiblen **Motion Tracking** zusammen, bei dem **das Kamerabild und der Bewegungssensor-Eingabe** kombiniert wird, um festzustellen, wie sich das Gerät des Nutzers in der realen Welt bewegt.

Um jedes Gerät zu zertifizieren, überprüfen wir die **Qualität der Kamera, der Bewegungssensoren und der Designarchitektur**, um sicherzustellen, dass es die **erwartete Leistung erfüllt**.

Außerdem muss das Gerät über **eine ausreichend leistungsfähige CPU** verfügen, die in das Hardware-Design integriert ist, **um eine gute Leistung und effektive Echtzeit-Berechnungen zu gewährleisten**.

Wir arbeiten ständig mit den Herstellern zusammen, um sicherzustellen, dass ihre Hardware und Konstruktionen diesen Anforderungen entsprechen. Gleichzeitig arbeiten wir intern daran, sicherzustellen, dass ARCore gut in jedes von uns zertifizierte Modell integriert wird, um den Anwendern gute Erfahrungen zu bieten.

Die folgende Tabelle fasst die unterstützten Modelle nach Herstellern zusammen, wobei eventuelle modellspezifische Einschränkungen verzeichnet werden.

### iOS

Produkt	Modell	Notiz
iPhone	iPhone 11	
iPhone	11 Pro	
iPhone	11 Pro Max	
iPhone	iPhone XR	
iPhone	iPhone XS and XS Max	
iPhone	iPhone X	
iPhone	iPhone 8 and 8 Plus	
iPhone	iPhone 7 and 7 Plus	
iPhone	iPhone 6S and 6S Plus	
iPhone	iPhone SE	
iPad	iPad Air 3rd Generation	
iPad	iPad mini 5th Generation	
iPad	12.9-in. iPad Pro (1st Generation)	

## ARCore-unterstützte Geräte
